

## Instructions

Firstly you will need to charge your light using USB cable included.

Charging – blue indicator light on  
Fully charged – red indicator light on  
Charge time – 4-6 hours

Once charged you will need to set the mode you require.

### Mode 1: Always on

Press switch for 2 seconds to turn on permanently.

**Mode 2: Motion & Light sensor – activated if motion detected within 10ft/3m, it will not be activated in bright light to save energy.**

From Mode 1 press switch for less than a second to activate Mode 2. The green light will show.

**Mode 3: Motion only sensor – activated if motion detected within 10ft/3m.**

From Mode 2 press switch for less than a second to activate Mode 3. The red light will show. When in your

selected mode simply affix to your container wall or roof using the magnetic strip and/or the 3M sticky back strip.

To turn off all modes press the switch for about 2 seconds while light is on.

**Specification:** Detecting Range: 3m (10ft) (T< 26°C) / Detecting Angle: 120 degree  
**Voltage:** USB 5V  
**Wattage:** 1.5W  
**Colour:** Pure white  
**LED number:** 33 PCS  
**Dimension:** 24x4x1.8cm (9.4"x1.6"x0.7")  
**Weight:** 145g

### Package Includes:

- 1 x Motion Sensor LED Light
- 1 x Magnetic Strip (with 3M Adhesive)
- 1 x USB Charger Cable
- 1 x User Manual

### Precautions:

- Do not use in very damp or very humid spaces
- If your container has significant condensation, we recommend mounting these lights on the container walls and not the roof
- Do not charge for more than 6 hours
- If the LED light is dim, recharge the unit
- Due to the integral Lithium-ion battery, do not use if the unit is damaged.

### Aftersales & Guarantee

12 Month warranty against any defects and covered by our 30 day money back guarantee – if for any reason these are not right for you, return them to us and we will refund you in full any time in the first 30 days after purchase.
